RELEVANT PROFESSIONAL EXPERIENCE

Head of Operations

Aug 2024 – Present

Enterprise Trustees Ltd – Accra, Ghana

As Head of Operations at Enterprise Trustees—Ghana's largest corporate pension trustee managing over GHS 13 billion in AUM—I lead a 25-member, multi-disciplinary team spanning core back-office operations, data insights, and analytics, driving efficiency, accuracy, and scalable performance across the organization.

- Oversee operations and administration across all portfolios, ensuring adherence to regulatory standards and maximizing operational integrity.
- Implement and optimize workflows utilizing data analytics, governance frameworks, and performance tracking to reduce errors and drive operational excellence.
- Oversee data governance, integrity, and compliance, ensuring alignment with regulatory requirements
- Champion cross-departmental communication, standardizing data reporting frameworks to deliver timely and accurate insights for strategic decision-making.
- Drive process automation and analytics-driven optimisation, improving operational KPIs including turnaround time and error rates.
- I serve as the key liaison between business and IT, translating operational requirements and business logic into clear technical specifications and system implementations.

Business Analyst (Data & Analytics Consultant)

Mar 2022 - Current

Upwork, Fiver, Freelancer, - Remote

Deliver data science and analytics solutions across industries including insurance, healthcare, and sales.

- Apply data mining and statistical analysis to uncover patterns in sales, claims, and operational data
- Develop interactive dashboards (Power BI, Tableau) to visualise KPIs and business performance
- Build predictive models to improve forecasting, claims accuracy, and decision-making
- Translate complex datasets into actionable insights for business stakeholders

Fund Analyst (Business Analytics & Data Processing)

Jul 2019 – Jun 2024

Databank Asset Management Ltd – Accra, Ghana

Delivered advanced analytics across 150+ investment portfolios, supporting investment decisions and operational efficiency.

- Conducted quantitative analysis and statistical modelling on portfolio performance data
- Implemented data standardisation and ETL processes, improving data usability across teams
- Developed an issue resolution and workflow automation portal for 200+ portfolios, reducing resolution time by 30%
- Led data quality and governance initiatives, reducing system errors by over 70%
- Collaborated with technology teams to enhance data systems and reporting infrastructure

Data Analyst

Jun 2017 - Jun 2019

Conceptxubes Analytics - Accra, Ghana

I enhanced route-to-market forecasting accuracy through predictive modeling and contributed to revenue growth by developing financial models. Additionally, I converted data into actionable insights, positively impacting overall business performance.

- Applied predictive modeling techniques using python, MS SQL and data warehousing programs, Tableau, Power BI, and other tools, resulting in improved forecasting accuracy for route-to-market strategies.
- Developed and implemented financial models that significantly contributed to increased revenue generation for clients.
- Designed data visualisation dashboards to communicate insights effectively
- Processed and analysed large structured datasets to generate actionable business insights

ADDITIONAL EXPERIENCE

Head-Business Development

Jul 2015 - May 2017

M&C Energy – Accra, Accra

- Developed business proposals for new and existing customers.
- Acquired and maintained 8 institutional clients for the supply of petroleum products at a time power outages were rampant.

Audit Assistant

Sep 2014 - Jun 2015

M&C Management Consult – Accra, Ghana

- Provided significant help and support to senior professionals to review a corporation's internal controls and procedures.
- Prepared invoice to clients for services rendered.
